

# Eastman Lake Watershed Land Use/Land Cover on Shorelines and Streambanks

## Legend

### Buildings

-  Septic System
-  Sewer Connection
-  Conserved & Public Land
-  Fields/Cleared
-  Forested
-  Institutional
-  High-Density Residential
-  Medium-Density Residential
-  Transportation
-  Water

### Land Use/Land Cover - Streams and Shorelines

| Land Use Class               | Acres        | Percent |
|------------------------------|--------------|---------|
| Fields/Cleared               | 49           | 4%      |
| Forested (includes wetlands) | 1,070        | 79%     |
| Institutional                | 5            | <1%     |
| High-Density Residential     | 38           | 3%      |
| Medium-Density Residential   | 93           | 7%      |
| Transportation               | 94           | 7%      |
| <b>All Land Uses</b>         | <b>1,349</b> |         |

\* Land in watershed within 250 ft of stream or pond

Land use classification developed from 2008 National Agricultural Imagery Program photography, 1:12,000 scale, checked against Enfield and Grantham town GIS data. Building footprints from Enfield, 2007, and Grantham, 2008. Sewer connection extrapolated from Eastman Sewer Co. schematics, 1978-1983. Waterbody data from New Hampshire Hydrography Dataset, 2006, 1:24,000 scale. Watershed boundary developed from USGS 7.5-min topographic maps, 1:24,000 scale. Conserved and public land, 2008, from NH GRANIT; boundaries are approximate.
